# ONTARIO POPULATION STATISTICS

1970

## INTRODUCTION

---

This publication is designed to provide, in a single volume, population data for Ontario municipalities for the period 1951 to 1970. Municipalities examining their own communities and planning for their future development should find it useful as a source of basic data on trends and change.

The major source of data is the Dominion Bureau of Statistics for the census years 1951 to 1966. More recent data, from the Department of Municipal Affairs assessment records, is provided for the years 1967 to 1970. It should be noted that the figures from DBS and DMA are not strictly comparable. The reasons for this are discussed in the reference notes on the following page.

Population figures are used in planning to indicate the size of a municipality and the trend in size. This information appears in Table A for each municipality.

The average annual rate of population change appears in Table B for various time periods between the census years 1951 and 1966. Using Table B, a direct comparison of rates can be made between time periods for a specific municipality or between municipalities for a specific time period.

Table C indicates the size of each municipality in relation to the regional municipality, district municipality, county or district in which it is located. Such a population comparison is one indicator of the relative importance of the municipality.

From time to time, annexations and amalgamations change the boundaries of municipalities, which are the geographic areas used for recording the population statistics. Where such a change has occurred, a symbol appears after the population figure, indicating the nature of the change. These symbols are explained in the reference notes which should be used as a guide in interpreting the tables.

Population data for a specific municipality can be located by referring to the regional municipality, district municipality, county or district in which the municipality is located. Here the municipalities are grouped by municipal status under cities, towns, villages, boroughs and townships and arranged alphabetically.

Ontario Population Statistics is prepared annually in the Research Section, Research and Special Studies, Community Planning Branch, Department of Municipal Affairs.

## REFERENCE NOTES

---

The Dominion Bureau of Statistics population figures and Department of Municipal Affairs population figures are not strictly comparable. DBS figures cover the total population in each municipality. DMA figures include assessed persons, non-assessed persons eligible to vote and children. This means that residents of institutions and persons in defence establishments are not included so normally DMA figures should be lower than DBS.

Another factor affecting the figures is the enumeration time. The DBS figures are for a specific date, June 1st, but the DMA enumeration is taken over an extended period. As there may be considerable mobility during the DMA enumeration period, it is difficult to avoid the possibility of double counting or non-counting of permanent residents.

In view of these differences between the two sources, DMA figures are included for two census years. This enables the reader to compare DBS and DMA population figures for the two most recent census years, 1961 and 1966, for the area which concerns him.

The DMA enumeration is recorded each year according to the current status of each municipality. This year, for example, the Town of Pembroke became the City of Pembroke on January 1, 1971, so 1970 population is recorded for the City of Pembroke.

Another example is Metropolitan Toronto which was reorganized on January 1, 1967. The DMA population figures for 1966 are shown for the new municipalities -- the city and boroughs only. This differs from DBS which gives the population of the city, towns, villages and boroughs as they existed when the Census was taken in 1966.

When there is a change in the status or name of a municipality or in a municipal boundary, the nature of the change is indicated by one of the following letter symbols, located after the population figure:

- A Amalgamation
- T Annexation to
- F Annexation from
- S New municipality or change in status
- D Dissolution
- R Renaming
- G Several changes associated with regional government reorganization
- C Other or a combination of several changes
- P Prior to incorporation or reduction

These explanatory notes are provided to enable the reader to use the figures with some knowledge of their limitations. Despite their limitations, these figures provide the most reliable and up-to-date population data for municipalities in Ontario.
